

# ABHIJIT CHAKRABORTY

## Manager, Partner Solutions Architect, Cloud Partnerships · MongoDB

Palo Alto, CA · +1 408 921 2573 · abhijit.chak@gmail.com · linkedin.com/in/abhijitchak · abhijit85.github.io

Technical leader with 20+ years across cloud partnerships, enterprise data platforms and applied AI, and a record of building teams from nothing from two to twenty at BT in a year, a ten-person India delivery team for Cisco WebEx that reached \$1.2M in six months with no attrition, and an engineering group of twenty engineers and four managers on next-generation OCI at Oracle. At MongoDB I own the technical side of the North America hyperscaler relationships, where a rejected Bedrock AgentCore proposal became one of the first ISV placements in AWS's AgentCore memory layer. Applying to lead the global Partner Solutions Architecture team with the same play, three clouds, at scale, with a scorecard attached.

### LEADERSHIP RECORD AT A GLANCE

- **Teams built:** 2 → 20 (BT, 12 months) · 0 → 10 (SRS for Cisco WebEx, 6 months, zero attrition) · 20 engineers + 4 managers (Oracle next-gen OCI) · cross-regional partner enablement across AMER, India, ANZ (MongoDB)
- **Revenue and cost outcomes:** \$1.2M new account in 6 months (SRS) · \$750K/yr saved on BT reporting migration · \$250K/yr saved on Cisco Oracle-to-Teradata migration · GHX a top North America revenue model two consecutive quarters (MongoDB)
- **Partner outcomes:** AgentCore memory-layer ISV placement at AWS · re:Invent 2026 breakout accepted (first for MongoDB's partner team) · agentic demo and workshop approved by MongoDB's CEO, CRO and CPO · AWS Skill Badge automation now used at marketing events

### EXPERIENCE

#### Manager, Partner Solutions Architect, Cloud Partnerships

Jun 2022 – present

MongoDB · Palo Alto, CA

- Own the technical relationship with AWS across North America; work with the Azure and Google Cloud teams. Design the architectures, run the enablement and shape the joint plays that turn a partnership into named accounts and traceable deals.
- Reframed a rejected Bedrock AgentCore short-term-memory proposal as long-term memory, which led AWS's AgentCore team to invite MongoDB as one of the first ISV partners in the memory layer. Co-presenter of an accepted re:Invent 2026 breakout on agent state and memory, the first breakout approved for partner-team members.
- Built the Magenta claims-agent demo and workshop (Magenta orchestration, S3 Tables and Aurora retrieval, Bedrock inference) approved by M3 MongoDB leadership and by AWS's partner leadership; presented at MongoDB .local New York.
- Account results: GHX a top North America revenue model two quarters running; Warner Bros. Discovery Project Cairo closed at \$1.25M; T-Mobile ~\$4.9M three-year deal positioning Atlas as the embedding and memory layer via Bedrock; Principal app-modernization win over an AWS-first pitch; JP Morgan global EA-to-Atlas payment-gateway migration across NA, EMEA and APAC; AMEX multi-cloud; Indeed platform workloads; Amazon Retail DynamoDB replacement in progress.
- Led without authority: automated the AWS Skill Badge integration with AWS marketing, now used at events; extended train-the-trainer enablement to India and ANZ with Vietnam in discussion; run a biweekly technical partner community with attendees across India, LATAM, Singapore and APAC; recruited AWS technical champions; wrote the field playbook for partnership deals.
- Built relationships with field leadership (West/Canada, East and enterprise RVPs) and present partner wins in their team meetings; worked with product management on Atlas feature requests now prioritized.
- Speaker: AWS GenAI Loft, MongoDB .local San Francisco and New York, Mastercard CEO/CTO fireside chat (AWS campaign), LangChain community event, US Foods hackathon (38 hands-on builders of 102 registrants).

#### Sr. Manager, Engineer → Engineering Lead, Next-Generation OCI

Jun 2015 – May 2022

Oracle · Redwood Shores, CA

- Joined as an individual contributor building autonomous DevOps tooling and distributed data platforms for Oracle Cloud Applications; automated ETL across millions of rows (33% less manual work) and held 99.9% pipeline uptime across five transactional sources.
- Moved to the next-generation OCI team reporting to Don Johnson (SVP, formerly AWS); led a group of 20 engineers and 4 managers delivering on OCI Autonomous Database and a serverless point-of-sale system.
- Built the cloud integration framework from Vertica-on-AWS to Salesforce Marketing Cloud (Lambda, EC2, S3, SQS) and the real-time Informatica MDM to SFMC API, powering automated marketing campaigns; designed the division's BI warehouse (Data Vault plus Kimball).

## Senior Data Engineer Lead (contract), Freight Data Platform

Oct 2014 – May 2015

**Prokarma for Union Pacific** · Omaha, NE

- Took on a new line of business to democratize freight operations data: real-time ingestion of driver, linesman and track events at 2,000 events/second into Vertica with Oracle GoldenGate CDC; migrated legacy ColdFusion reporting to Oracle Sales CRM; built the real-time monitoring front end.

## Lead Business Value Consultant → Engagement Lead

May 2011 – Sep 2014

**Infosys Consulting and SRS Consulting, for Cisco and AC Nielsen** · San Jose, CA

- At SRS Consulting, a startup serving Cisco: asked to establish and grow the India team for Cisco's newly acquired WebEx. In six months built a ten-person team and an account exceeding \$1.2M in revenue, with zero attrition.
- On that record, recruited into Infosys Consulting's business value consulting practice by Ravi Kumar, then head of consulting; replicated the playbook with strategies tailored to each client, grew the manufacturing and analytics domains and brought in new clients like AC Nielsen, Jaguar Land Rover, Meta.
- Led the Oracle-to-Teradata migration team for Cisco analytics, saving \$250K a year in maintenance; cut vendor-data pipeline errors 7%; improved BI query performance 10%; localized reporting that lifted BI adoption 7%.

## Data Engineer → Delivery Lead (contract)

Nov 2007 – Apr 2011

**British Telecom** · Cardiff, Wales

- Scaled the delivery team from 2 to 20 people (3 onshore, 17 offshore) in twelve months and earned the onsite role leading and growing the account.
- Led the migration from Business Objects to Oracle BI and CRM: \$750K a year saved and 15% faster reporting. Built the ETL platform for web apps with 10,000 daily active users, saving \$85K a year in vendor costs, and the Orange Wholesale BI warehouse that scaled to 115,000 daily users.

## EDUCATION

---

### Ph.D. Computer Science (AI, big data and distributed systems), in progress

**Arizona State University, CoRAL Lab, advised by Dr. Vivek Gupta** · Dean's List [GSA]

Research in federated retrieval-augmented generation, interpretable knowledge-graph embeddings and multi-agent systems.

### M.S. Computer Science (Big Data Systems)

**Arizona State University** · Gold Medal [summa cum laude]

### B.Tech. Electrical Engineering (NIT, Durgapur)

**West Bengal University of Technology (MAKAUT), India**

## RESEARCH, SPEAKING AND COMMUNITY

---

- **Publications:** Machine Learning Operations: A Mapping Study (CSCE 2024) · Is Architectural Complexity Overrated? Interpretable Knowledge Graph Completion with RelatE (arXiv 2025, NeurIPS 2025) · Federated Retrieval-Augmented Generation: A Systematic Mapping Study (arXiv 2025, EMNLP 2025) and more.
- **Peer review:** NeurIPS, AAAI, ACL, NeuroComputing, ICML and EMNLP reviewer (trustworthy AI, federated learning, retrieval)
- **Speaking:** AWS re:Invent 2026 breakout (accepted) · MongoDB .local SF and NY · AWS GenAI Loft · industry and customer events on agentic architecture and AI data platforms
- **Advisory and open source:** Harvard Business Review Board of Advisors · Apache Software Foundation contributor (data pipelines, governance)

## CERTIFICATIONS
